

on track to improved profit and lifestyle

CTF – VIAGRA FOR YOUR FARM

Are you worried about crops under performing, running out of steam too early, shriveling up when the pressure comes on? Chances are CTF Solutions can help you find a way to enjoy a longer and more satisfying farming experience.

Our CTF for Success package is designed for farmers who want to improve; crops, resources, lifestyle, all are part of the environment you work in. We look at your current system with a new pair of eyes, we analyse what you have, what you are doing and what you want to do during our first visit.

We then provide you with a comprehensive report including our perspective on some possible ways forward. During our second visit we discuss the report with you and help you develop an action plan that suits your budget, goals and aspirations.

We then provide follow up and support as you move forward. Our teams' skill base covers soil science, machinery, farming systems, guidance and precision ag, resource management and allocation, compliance and training. With almost any decision you need to make with regards to running the farm, there is a good chance that we have people who will be able to make a meaningful contribution to that process.

It stands to reason that support can only be as effective as you want it to be. If you are contemplating making a major change, a machinery purchase for example, economics mean that you are locked into using that machine and consequently the farming system for a number of years. As independent consultants we can discuss issues without fear or favour and provide you with an effective sounding board for new concepts, ideas and decisions.

Obviously, we believe controlled traffic is a key driver of a better farming system. If you decide to partner with us, you will be partnering with the team which started CTF back in '94. Our experience and the Australian wide success of our system means you can be confident you will have the best support available every step of the way.

We do not provide day to day agronomy advice; most growers we deal with already have an established relationship with an agronomist. We do not have the time, resources or inclination to work at that level; rather we are happy for you to feel free to involve all your suppliers in your discussions with us.

Price \$5000 (+GST) includes farm visits, reports and 12 months support, or \$1000 (+GST) for a single visit snapshot (additional travel charges apply outside Qld & NSW).
